

WELCOME HOME TO QUALITY AND STYLE

COMPOSITE DOORS

 **TruFrame**

Beauty and security for your home

Are you tired of compromising on beauty, security, and durability when it comes to your home's entrance? Look no further than our unbeatable range of composite doors - the perfect blend of style, resilience, and functionality.

Our composite doors are meticulously crafted to redefine the standards of excellence, while providing an array of incredible benefits that are sure to enhance your living experience. We understand the need for a door that not only offers security but also enhances the aesthetic appeal of your home.

Our doors come in a wide range of designs, colours and finishes, allowing you to choose the perfect style that matches your home's unique character. Whether you prefer a traditional, contemporary, or designer look, we have the ideal door to complement your taste and elevate your home's kerb appeal.

Make an entrance

When it comes to beauty, security and energy efficiency, doesn't your home deserve the best?

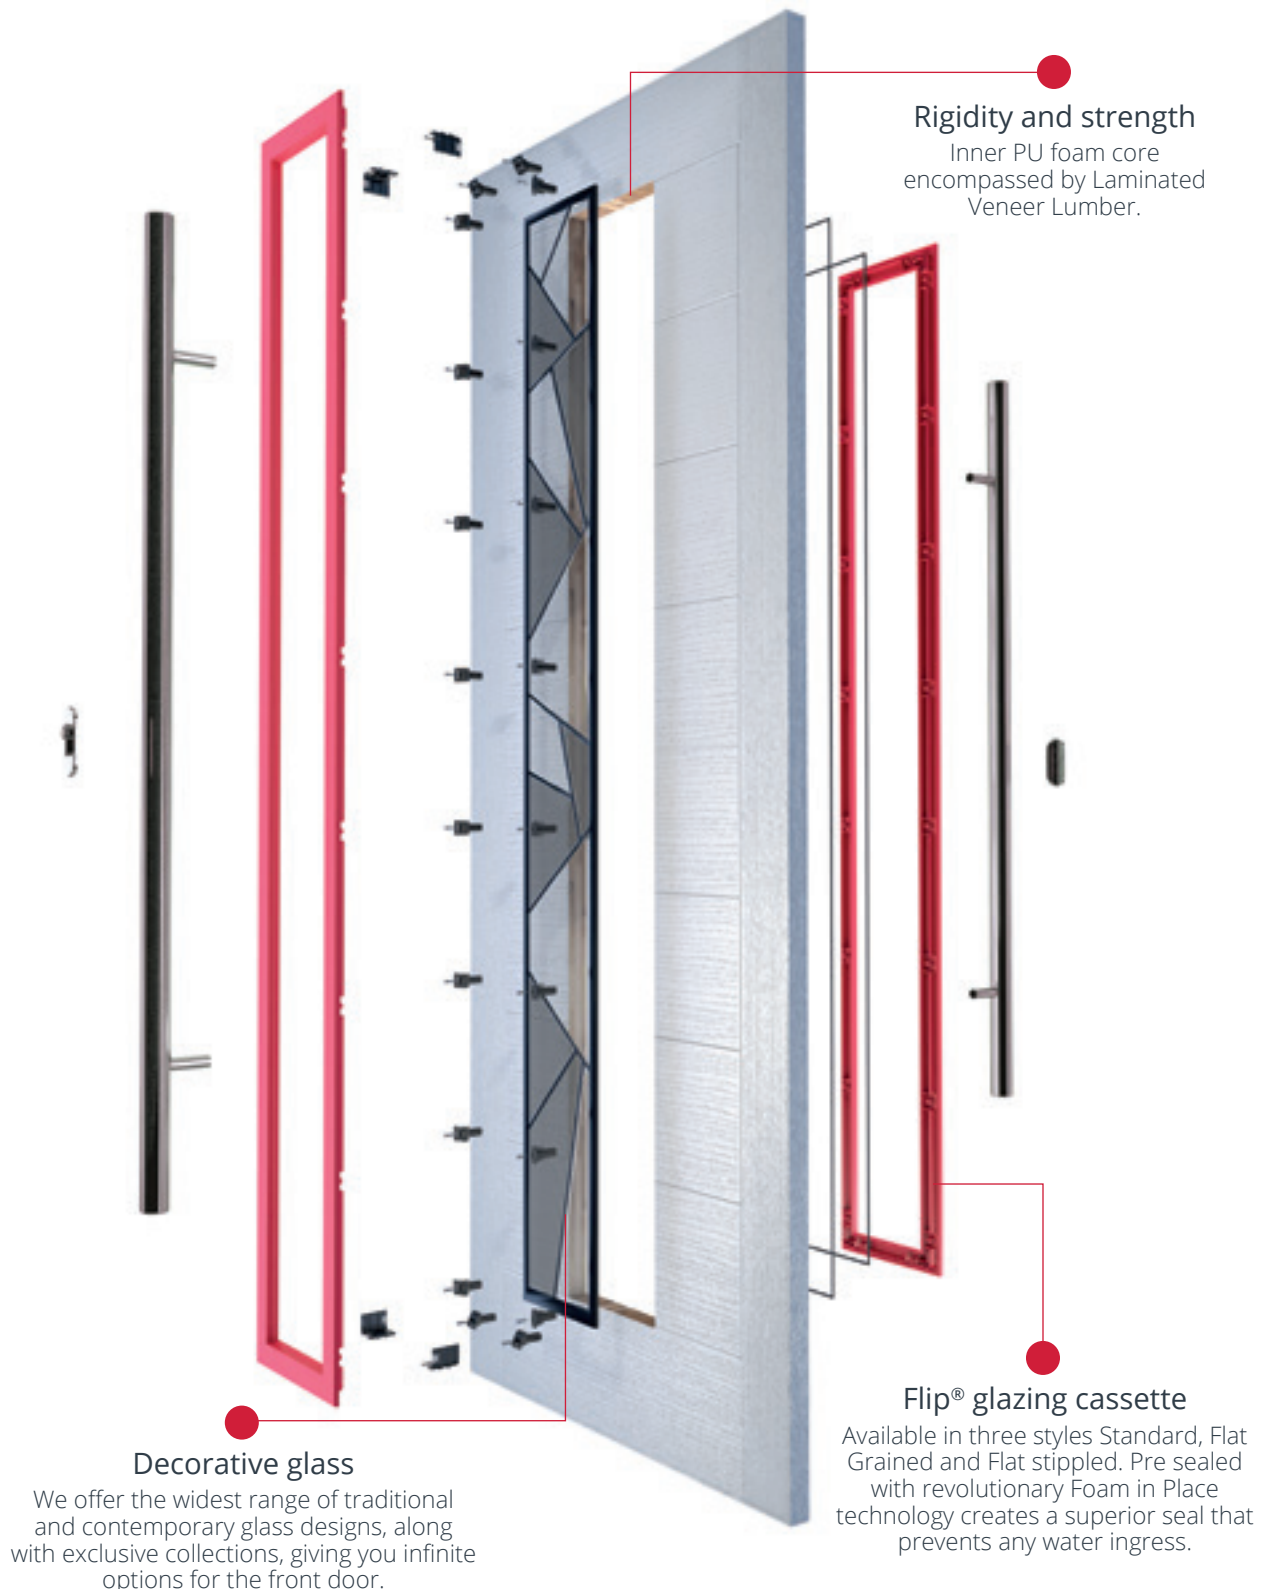

Our composite doors are the minimal-maintenance alternative to traditional door materials. With a high-definition smooth or grained Glass Reinforced Plastic (GRP) outer skin that will look stunning for years to come, delivering kerb appeal for any property.

All of our doors offer stability from the elements with their inner core of LVL (Laminated Veneer Lumber) encased with composite stiles and rails for protection against any water ingress. While the inner cores are manufactured from high density polyurethane foam, which offers exceptional thermal efficiency and will help to reduce energy bills in comparison with any other door on the market.

Traditional, yet modern

GRP outer skins provide the look and feel of traditional woodgrained doors, but without the maintenance.

Compliment any home

With a wide range of traditional, rural, contemporary and designer styles, our elegant composite doors enhance any property.

KEY DETAILS

High security locking

High Density Foam Core

Energy Efficient

Environmentally friendly

Secured by Design standard

Design options

There is a comprehensive selection of styles across our range of Composite Doors.

Fully weatherproof

Thanks to a water proof skin and double-sealed uPVC outer frame, your door will never swell or stick as no moisture is able to get into it.

Glazing styles

Each type adds something different to the overall look and there's a design to suit every type of home.

Highest security

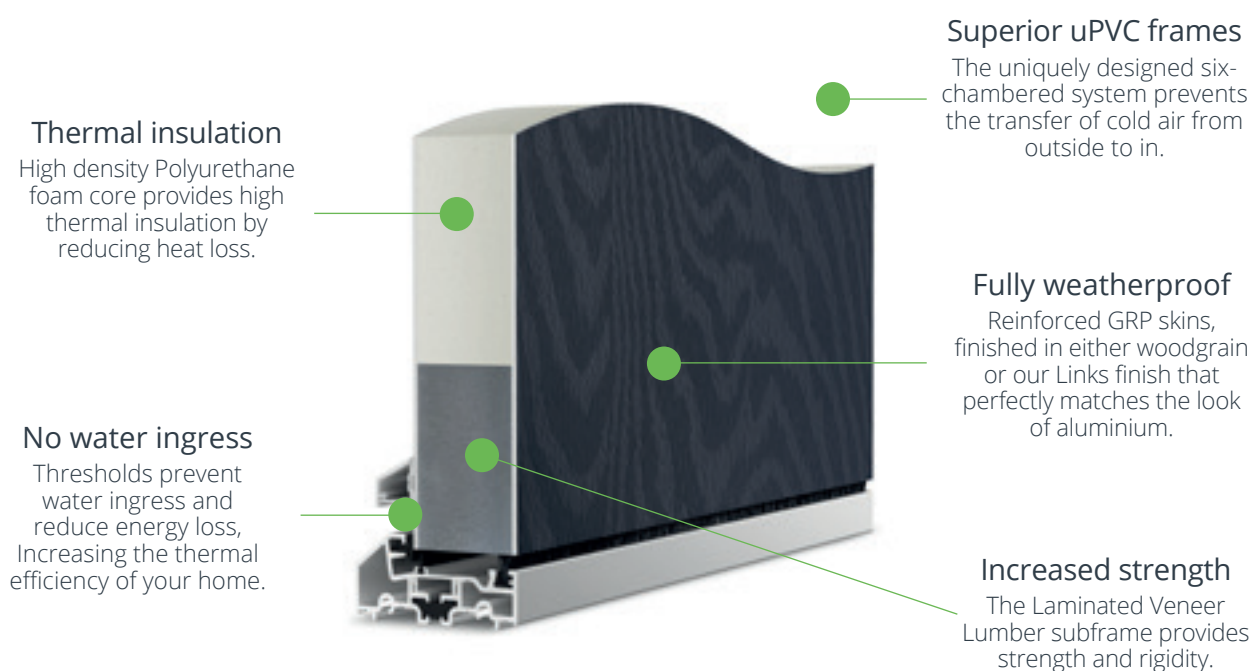

Keep intruders at bay with a multipoint locking system, designed to withstand all attack methods.

The perfect system

Choose our door systems, and you're making the smartest home improvement decision you could ever make

The innovative door system is both thermally efficient and steadfastly secure, keeping your home warm and safe at all times.

Why we choose Linar

Our frames are designed and manufactured using innovative methods and materials, ensuring you're covered against warping, splitting and discolouration for a minimum of 10 years.

10 Year Guarantee

All frames come with a 10 year guarantee from the date of installation. You can rest assured that our products are built to last.

Thermal Efficiency

Our window systems deliver superior thermal and energy efficiency, achieving a Window Energy Rating of A+14 and a U-value as low as 1.3 W/m²k.

Environmentally Friendly

All our products are guaranteed 100% lead-free. Environmentally friendly in materials and production, choosing Linar reduces your environmental impact.

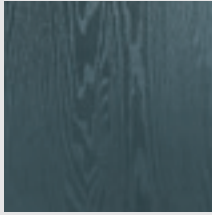

Door styles at a glance

From traditional to contemporary, cottage to designer, whichever door style you choose, it's guaranteed to bring enduring style to your property.

Our composite doors are available with a variety of glazing cassettes, allowing you to select the perfect style to complete your door. For more about the cassette types, see page 68.

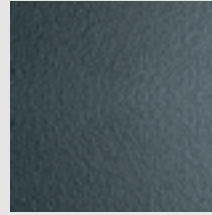

[illegible]

Panel styles

Woodgrained and Moulded Panels

These doors have a simulated woodgrain pattern to give them an authentic timber appearance.

Links Panels

These doors have a unique 'stippled' texture to give them the appearance of aluminium doors.

* Also available with Flat Grain Cassettes

Endless possibilities

Our door glazing cassette system with a revolutionary Foam in Place technology, delivers a superior seal and aesthetic never seen before. Choose from one of three options to suit any style of door from contemporary to traditional.

Standard Cassette

The traditional choice with a moulded design and a woodgrain finish to suit a more conventional door design.

Flat Grained Cassette

Be eclectic by combining a woodgrain finish with a modern squared-off flat profile that compliments a contemporary door design.

Flat Stipple Cassette

The modern one, with a squared-off flat profile and smooth stippled finish that perfectly matches our Links, aluminium-effect composite door.

European style

Inox glazed doors combine high performance with beautiful stainless steel aesthetics to give a truly designer look to any entrance.

Inspirational, beautiful and the ultimate in style

Our door class collection has been created to provide you with a wealth of choice to enhance your composite door and create a first impression that speaks volumes.

While every effort is made to make the glazing within the cassettes as close as possible to what is shown in the brochure, these images are for illustrative purposes and the final product may differ due to the manufacturing process and in real-world lighting conditions.

Complete peace of mind

Keep your home and family fully protected.

The security of your home is of paramount importance to us, which is why we use the most secure multipoint locking systems on all our doors as standard, providing your home with the protection it deserves.

Locking systems

Lever operated

Doors specified with a lever/lever and lever/pad handle are supplied with a 5 hook multi-point door lock as standard.

Twin hook locking points provide next-generation enhanced security and are engaged when the handle lever is lifted and then the door is simply locked/unlocked by using the key.

Slam operated

This high-performance, multi-point slam lock is generally used in conjunction with 'Pull' handles.

The mechanical self-locking system ensures that the door is securely locked against uninvited entry when simply pulled shut. From outside, the latchbolts are retracted and the door opened by a simple turn of the key.

Heritage slam operated

The Heritage slam lock will help you achieve a classic door appearance which is both secure and functional.

The Heritage slam lock works in a similar way to the slam lock, although the lock is positioned higher up the door. Simply by closing the door, the top and bottom latches strike the keep and fully engage to become secure deadbolts.

1

Pre-compression Roller

Ensures smooth operation and maximises weather proofing.

2

Anti-lift Pins

Slots into the frame to prevent the door from being moved or lifted.

3

Centre latch and hook

A combined central latch and anti-separation hook create a solid and rigid locking point.

4

Claw hooks

Grips the door sash to the frame for extra strength and solidity.

High security

Awarded the Police 'Secured by Design' accreditation, our multipoint locks have been rigorously tested to the very highest security standards.

British built

Production, testing and assembly of all our door locking systems, are carried out in the UK.

Intelligent locking

Intelligent, compact and robust locks, which work perfectly with the design of our windows and doors.

10 year guarantee

The multipoint locking system comes with a 10 year guarantee as standard, providing complete peace of mind.

The finishing touch

Once you've chosen the design of your door, you can exercise your creativity with a huge choice of colour, finish and styling for your door hardware, security and accessories.

Make a statement with a wide choice of handles, letterplates, knockers and spyholes.

A break from tradition

Unlike traditional cylinders, the BreakSafe has been designed to allow a section of the cylinder to “break away” in the event of a snapping attack. Giving you additional peace of mind, at no extra cost.

Perfectly flush

The BreakSafe cylinder face finishes much closer to the handle backplate, providing even greater protection from attack.

Polished finish

A variety of options are available including ergonomic thumbturn, in two high quality finishes - polished chrome and polished brass.

The highest level of protection

The patented locking cam system of the ATK lock is proven in the market to effectively combat against lock snapping and forced entry methods of attack.

Sold Secure Diamond

ATK has the Master Locksmith Association's highest rating - SS312 Sold Secure Diamond, TS007 3 star rating, British Kitemark and Secured by Design accreditations.

Finishing touch

Dual colour polished Chrome/Brass or Matt Brass options available, including ergonomic thumbturn variants.

Letterplates

Sleek and contemporary, our letterplates keep drafts out and the heat in, and are available in a range of colours and options to match your styling choices.

Door knockers/Spyholes

Elegant and lustrous, our door knockers and spyholes add a flourish to your entrance door.

Numbers/Numerals

Give your door the personal touch with elegant identification.

The Heritage Collection

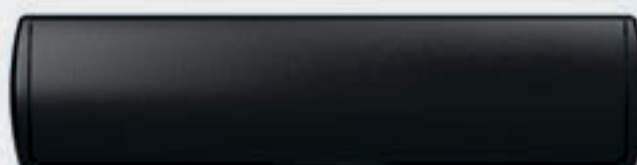

Combining authentic styling with high quality, traditional and modern finishes.

Thresholds

This component of the door may go unnoticed in many entrance doors, but play a crucial part in making sure your home receives a higher Door Set Energy Rating (DSER).

Paired with gaskets and door frames to seal the bottom opening between the sash and the frame, they prevent water ingress and reduce energy loss, which increases the thermal efficiency of your home.

Standard Frame

Their higher thermal efficiency will help contribute in giving your entrance door a higher DSER. This type of threshold is generally used where the floor is raised with taller flooring such as carpet.

Aluminium Low

Not as tall as our standard option, this is a great option for homeowners with mobility issues or with floors that are not as raised, such as laminate or wooden flooring.

Aluminium Low Half Tray

If you are a wheelchair user or have certain mobility needs, then this could be the ideal door for you given the sloping ramp which will allow easy access in and out of a property.

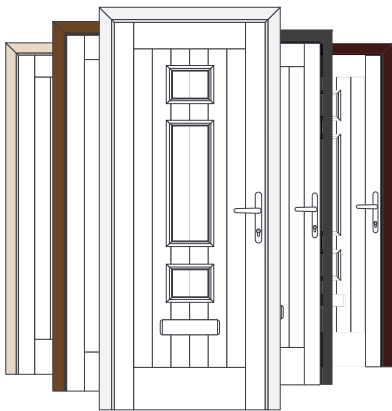

Aluminium Low Full Tray

The additional ramp inside will allow for much easier access into a home, for wheelchair users and those with babies or young children that require prams.

Open up a world of colour

To ensure the perfect match, all our doors and frames are available in a wide choice of colours.

With nine standard colours and over 60 premium colours, not to mention the limitless possibility with RAL® and Farrow & Ball colours as an optional extra, creating the look you want has never been easier.

Frame Colour

Available in a variety of colours and finishes to compliment your door.

Dual colours

Tailor your doors to your own specification by choosing the same exterior and interior colours, or a combination.

Door colours shown in this brochure should be used for guidance only. We have made every effort to match the colour and stain you see in the brochure, so it's as close as possible to our paint when applied to the doors. Due to the nature of the product it is applied to there is sometimes a difference between them, which unfortunately we cannot avoid. The colour, intensity and sheen level may differ from the paper print version and we do not accept any liability for this for any reason. Longer lead times are required with premium colours. All doors come with white interior as standard.

Quality and care

Your new door should keep you safe and secure for years to come, however with all products and especially those that are exposed to the elements we recommend that you carry out a care and maintenance routine.

- Door frames should be washed with warm soapy water, however stubborn stains can be removed using specialist uPVC cleaners and by following the manufacturers' guidelines.
- The door leaf should only be cleaned using warm water or non-aggressive composite door wipes. No solvent-based product or abrasives should be used as these will damage the surface of the skin.
- External glass should be cleaned with warm soapy water and cleaned with a proprietary glass cleaner.
- Hardware can be cleaned with a mild detergent and wiped clean. No harsh chemicals or abrasives should be used.
- Maintenance of the door may be required to maintain any guarantees from the installer.
- Hinges should be lubricated with engineering oil. Cylinders can be lubricated with Teflon-based products only, as other oils may cause degradation. If necessary, a small amount of lubricant can be applied to the moving parts such as letterplates, handles and knockers.

The mark of quality

With TruFrame as our partners, you can have complete confidence in placing your trust with us. We have an excellent local reputation for the quality and value for money we provide to all our customers, old and new.
